ConfigureSpace tools Pages Electronics, Software & Connectivity Home Home Common - Projects and Activities BSH to Bosch migration - Backend/Server/Active Directory Created by Schoetz Florian (BSH GDS-BCL3), last modified on 2023, May 19 Current Version V 5 Page Info

The primary target of this migration should be the change from BSH Active Directory as authentication and authorization system towards a Bosch provided solution. But to have a sustainable solution implemented we also have to think about other regulations which will come up sooner or later and will result in another migration if we don't handle it now! Bosch ADFS is seen as expiring and frumpy way to authenticate/authorize Switch directly to Azure AD (OIDC, SAML) OIDC â†’ Open ID Connect, can be done via self service in Azure AD SAML â†’ only with Bosch support Use IdM roles to grant access to your application SL3 must be serverless in future; No servers will be allowed anymore in SL3 SL1/SL2 internet facing SL4 Openshift (Container Service Environment in BPC) â†’ kind of own Security Layer, Firewall Rules on Demand Bosch Development Cloud (BDC) BSH IT Shop migration to ITSP EpiTop â†’ you have to onboard your IT-Service at Bosch â†’ we may get support from the "Integration Team" (BD/POA) which will support during the onboarding Be aware that we have to follow the migration process, starting with filling the Excel Template and the Architecture Template and then reaching out to our BSH Migration Team: Ulker, Sadik (GDS-SET) KOZA-ext, OZGUR BULENT (GDS-SET) KAYA-ext, Abdullah (GDS-SET) Links Application Migration Project RB IdM/AD IDE (Integrated Developer Environment) OpenShift Azure AD Sample Project Onboarding Bosch IdP Onboarding â†’ this is the general process which is out of scope for the whole migration project. Within the project the migration teams will support here.
